

PaintShop Pro Tutorials

By Maureen Eyes-Lavis

TITLE: MAKE IT GOLD!

PaintShop Photo Pro X6

Website: [Creative-Designs](#)

Materials: Tubes

This tutorial can be done in previous versions

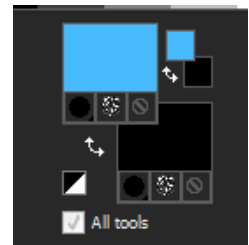

DESCRIPTION

In this tutorial you will learn how to create gold or silver effect from a Picture Tube and applying effects to create some truly great finishes to graphics.

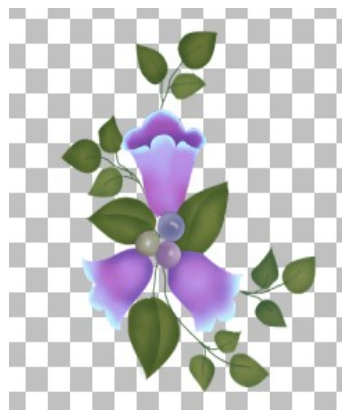

Open a transparent canvas of 500x500.

Add the following colour to the foreground palette in Materials

#48bafc and background colour black.

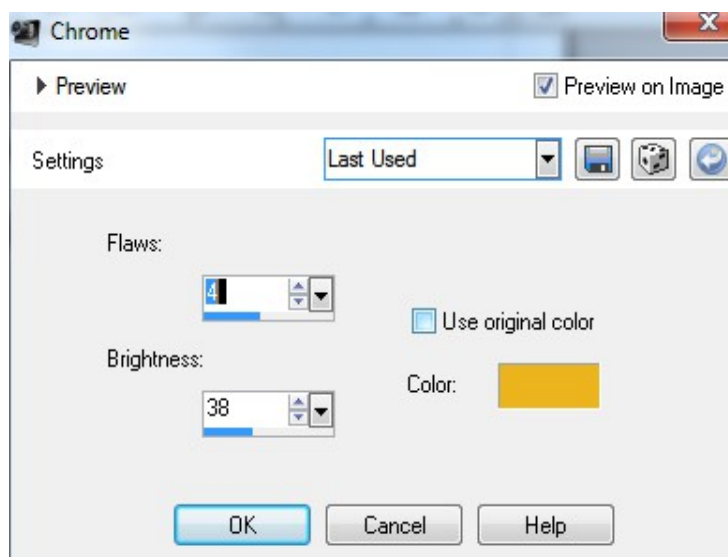

Select a Picture Tube and paint onto the transparent canvas.

Open Effects > Artistic Effects > Hot Wax Coating. This will give the tube blue colours.

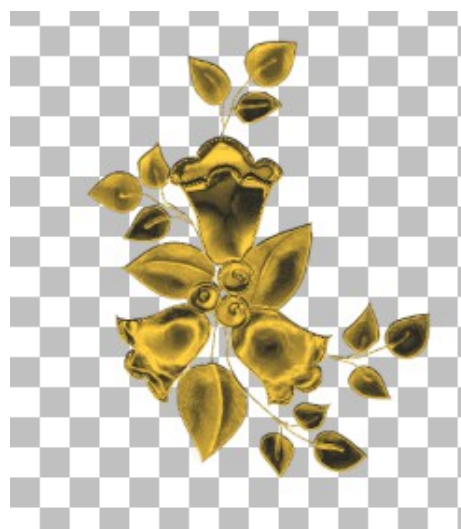

Next, Go back to Effects, Artistic Effects > Chrome. The Settings can be adjusted according to how you wish your image to look.

Try different grey/whitish colour to give silver effect rather than gold. Increase/decrease the Brightness. The higher the value of Flaws will give more markings on the image.

Click ok when you are satisfied with your settings.

Open Adjust, One Step Photo Fix and that's it.

Any other embellishments, background is entirely up to your imagination. However, you can create some lovely images using these techniques.

Just a few examples of what you can create

Have fun and thank you for trying out this tutorial.
